Education

Bachelor of Science in Information Technology

June 2013 - April 2017

Jose Rizal University

Work Experience

CoDev

January 2023 - Present

Full Stack Developer

- Developed and implemented websites based on Figma mockups, primarily using WordPress, Laravel, PHP, Symfony, Blade, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3, SCSS, JavaScript, Alpine JS and MySQL.
- Managed, created, and maintained a custom boilerplate project built with Roots Sage, Roots Bedrock, and ACF StoutLogic — optimized for quick developer onboarding.
- Configured and managed Docker environments for the boilerplate project.
- Developed reusable custom blocks within the boilerplate framework.
- Implemented custom, dynamic filters using AJAX and MVC pattern.
- Utilized Composer, npm, Yarn, and Webpack to manage plugin, module, and library dependencies.
- Used Git and GitHub for version control to streamline and centralize website development.
- Implemented GitHub Actions for CI/CD to deploy the codebase across multiple environments.

- PHP
- TWIG Template Engine
- Blade Template Engine
- Model View Controller (MVC)
- MySQL
- Tailwind
- Bootstrap
- Javascript
- Alpine JS
- jQuery
- Ajax
- JSON
- REST API
- Postman
- HTML 5
- CSS 3
- SCSS
- Git
- GitHub
- GitHub Action CI / CD
- Docker
- Composer
- NPM
- Vite
- Webpack
- Laravel Mix
- Gulp JS
- Linux / Bash / Shell Scripting
- Claude Code
- OpenCode

Copia Digital

January 2023 - October 2026

Full Stack Developer

- Developed and implemented websites based on Figma mockups, primarily using WordPress, Laravel, PHP, Symfony, Blade, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3, SCSS, JavaScript, Alpine JS and MySQL.
- Managed, created, and maintained a custom boilerplate project built with Roots Sage, Roots Bedrock, and ACF StoutLogic — optimized for quick developer onboarding.
- Configured and managed Docker environments for the boilerplate project.
- Developed reusable custom blocks within the boilerplate framework.
- Implemented custom, dynamic filters using AJAX and MVC pattern.
- Utilized Composer, npm, Yarn, and Webpack to manage plugin, module, and library dependencies.
- Used Git and GitHub for version control to streamline and centralize website development.
- Implemented GitHub Actions for CI/CD to deploy the codebase across multiple environments.

Yondu, Inc.

July 2022 - January 2023

Software Engineer II

- Integrated cmsable components into the New Globe One platform.
- Developed and exposed REST APIs for cmsable components used in New Globe One.
- Built a custom DateTimePicker for scheduling within the cmsable system.
- Created API routes to forward REST API requests to external platform servers.

Halcyon Digital Media Design Inc.

May 2019 - July 2022

Mid-Level Web Developer

- Developed and implemented websites based on Adobe XD and Figma mockups, primarily using Drupal, WordPress, Laravel, PHP, Symfony, TWIG, Blade, Bootstrap, HTML5, CSS3, SCSS, JavaScript, and MySQL.
- Integrated custom themes into all WordPress and Drupal projects using a personalized boilerplate setup.
- Implemented Sage, Bedrock, and Trellis in all WordPress-based projects for streamlined development and deployment.
- Managed plugin, module, and library dependencies using Composer, npm, Yarn, Webpack, and Gulp.js.
- Utilized Git and GitHub for version control, ensuring a centralized and organized development process.

Evervue Philippines Inc.

September 2018 - March 2019

Web Developer

- Developed and implemented websites, primarily using WordPress, PHP, HTML5, CSS3, JavaScript, and MySQL.
- Created and programmed e-commerce and commercial websites for the company’s electronic product line.
- Utilized Git and GitLab for version control, collaboration, and maintaining secure website backups.
- Integrated a custom backend theme for enhanced content management.
- Diagnosed and resolved programming errors and technical issues through strong skills in coding, debugging, and integration testing.
- Provided technical support for users in managing servers, maintaining access, and troubleshooting local networks and hardware issues.
- Set up employee equipment, including installation of TCP/IP configurations, cables, software, and hardware components.

GlobeTek Science Foundation Inc.

April 2017- August 2018

Web Developer

- Developed and implemented websites, primarily using WordPress, PHP, HTML5, CSS3, JavaScript, and MySQL.
- Built an e-commerce website for both retail products and an online restaurant for GlobeTek Science Foundation Inc.
- Developed and implemented a mobile application for the Earth Fashion Café online restaurant.
- Programmed an E-Learning System that allowed students and teachers to access grades and files, with functionality for teachers to input student grades directly into the system.
- Diagnosed and resolved programming errors and technical issues through effective debugging, coding, and integration testing.
- Created structural and 3D store replicas and schematics using SketchUp.
